

## WILLIAMSOUND

### Pocketalker 2.0

The Williams Sound Pocketalker 2.0 is the most recent addition to the Pocketalker family. It is a compact, convenient amplification device. This updated model is now equipped with stereo headset and t-coil compatibility. It makes one-on-one or small group conversations clearer and amplifies the volume on your television, stereo, or radio. Enjoy optimal sound performance when you combine the Pocketalker with a neckloop (not included) t-switch equipped hearing aid or cochlear implant.
